1. Claims 1-17 are allowed.

2. The following is an examiner's statement of reasons for allowance: applicant's arguments filed on 12/8/2005 regarding claims 1-17 are persuasive, the prior art of the record teaches a bi-directional pager communications system for monitoring remote stations wherein each remote station includes monitoring hardware, data storage to collect and record data received by the monitor and a pager to transmit the data to the user and the stations communicate with a mobile pager that can travel among the ranges of the stations and the ranges of the host control system and the mobile pager relays the received information to the host system and a global positioning system that monitors the position of the mobile pager; however, the prior art of the record fails to teach or fairly suggest in combination with the other elements and features of the claimed invention, in particular, independent claims 1, 7 and 14, a system and a method for communication between an industrial control device and a remote user device, which comprising a processor that determines whether a trigger condition exists and selectively constructs and transmits at least one pager message to the remote user device if a trigger condition exists. Associated dependent claims 2-6, 8-13 and 15-17 directly or indirectly depend on independent claims 1, 7 and 14 respectively are allowable over the prior art of the record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
